# HOW TO PREPARE FILES WITH WHITE INK

• In Illustrator create one Layer for the Image and One Layer for the White Ink
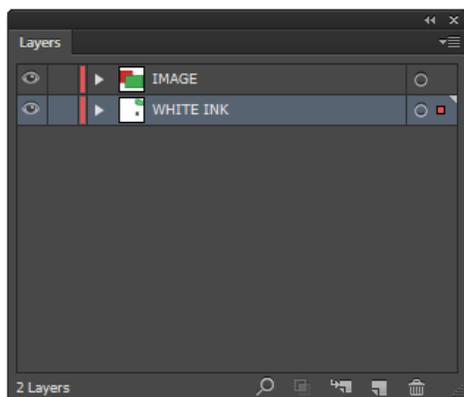

• Create one Spot Color named WHITE INK to be use for all elements that are going to be printed White

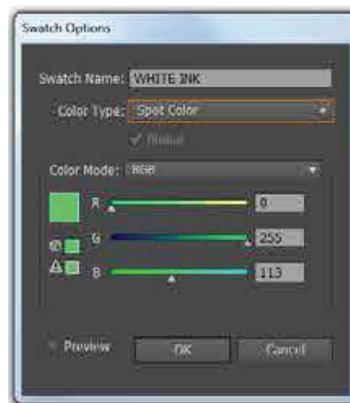

• Use the WHITE INK color in the corresponding layer to set all the white elements

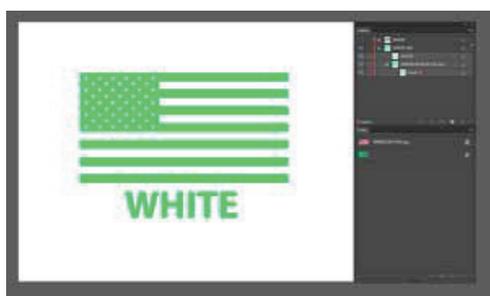

• When using images
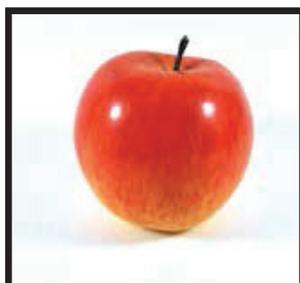

• Create a Channel with the desired area
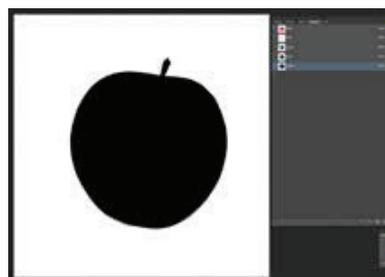

• Flattened the image and Coverted to Grayscale
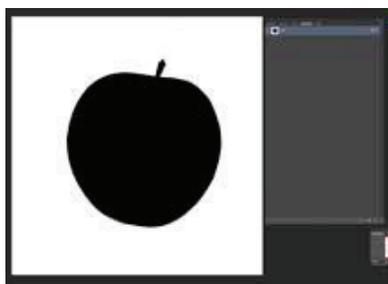

• Save it as Tiff place it in Illustrator and apply the White color
